PROJECTS

Islam 360 — Application ([PlayStore Islam360](#))

An application with more than 5M+ downloads, this app allows users to search Holy Quran, read Holy Quran and many other features.

Fog-Azure-RM — library (github.com/fog/fog-azure-rm)

A cloud agnostic library for the Azure Resource Manager.

OneOps — [@Walmartlabs\(oneops.com\)](https://walmartlabs.com/oneops)

OneOps is a cloud management and application lifecycle management platform that developers use to both develop and launch new products faster, and to more easily maintain them throughout their entire lifecycle. OneOps enables developers to code their products in a hybrid, multi-cloud environment.

PropAgile — Web Application(propagile.com)

PropAgile is a tool where customers can connect with service providers at any stage of a development; a marketplace to find, hire, communicate, share files, coordinate and track efficiency.

Painters Program — ERP ([AkzoNobel](#))

A web-based ERP for AkzoNobel Pakistan.

GoServeMe — Application

A complete business application which consists of web applications, mobile applications and administrations all aimed to help people find the best service providers in the area.

MyTV Kids — Application

The app was pretty simple in terms of UI/UX, just a few sections but the challenging part was disbursement of the gift and quiz section. Whenever the channel producer posts a question, the first 200 correct answers are qualified for a reward. Tracking real time questions and answers and showing notifications using sockets was a challenging

part for both back-end panel web developers and react native developers as well.

CompactMeds — *Application*

CompactMeds was an application which was designed to revolutionize the way we consume our medications on a day to day basis. The main focus of the app was to create a better communication channel between doctors and patients. This solution includes Android, iOS and web applications and an administration panel.

School 365 — *Application*

A complete end-to-end web, mobile and desktop based application for school internal management.

Kamal Zamindar Flour Mills — *ERP*

A web-based ERP for Kamil Zamindar General & Flour Mills Pvt Ltd. A tool that helped them in managing production, stocks, accounts, work-force and gate entries of vehicles as well.

Handyman — *Order Management System*

A web-based order management system developed for a Saudi-Arabian Company.

Shahanshah Industries — *ERP*

A web-based ERP for Shahanshah Industries that handles production, inventory, accounts, work-force of facility in which everyday there is new challenge.
